Change vehicle. The engine in your 2002 Dodge Durango may make the power, but it is the transmission (or transaxle) that sends it to rest of the driveline. With an automatic transmission (AT) the torque converter and flexplate are responsible for transferring the rotating engine power to the transmission. With a manual transmission (MT) the clutch disc, flywheel, pressure plate, and throwout bearing (or slave cylinder) all work together to get the power to the transmission front input shaft.
