TYPE-CERTIFICATE DATA SHEET

For take-off and flight planning pilots require the actual gross weight and the centre of gravity of an aircraft. A so called Weight and Balance System (WBS) has been certified in 1993 for all AIRBUS A330/A340 aircraft types. It is an on-board system which measures Gross Weight (GW) and Centre of Gravity (CG) on-ground and displays these values in real-time in the cockpit.

The weight and balance manual is part of the aircraft operating documentation. No different to flight operations manuals and maintenance manuals, the WBM provides detailed and specific instructions to the operator of the aircraft on how it must be loaded in order to be safe.

All about the Weight and Balance Manual | ULD CARE

The system is called a Weight and Balance System (WBS). It was introduced as an option on the A310 and has been certified on the A300-600, A320, 330 and 342 and 343. It involves strain sensors on each of the landing gears. From what I understand, the additional maintenance offsets fuel efficiency gains.
