Project management is in the unique position of being able to both enhance its practitioners' competencies and help advance the state of knowledge about the psychology of exceptional performance in ill-structured domains. The foundation for this eventual outcome has been laid in the work that project managers currently do.

Complex project management

Project management is as much about communication as it is about delivery. In fact, a successful, on-time, on-budget delivery is often because of good communication, and communication is in turn tied to how the human brain works: how we understand each other, how we say one thing but mean another, or how we communicate things in ways that are easier for people to
