The Theory of Constraints provides a powerful set of tools for helping to achieve that goal, including: The Five Focusing Steps (a methodology for identifying and eliminating constraints) The Thinking Processes (tools for analyzing and resolving problems) Throughput Accounting (a method for measuring performance and guiding management decisions)

### Focus Improvement on the Manufacturing Constraint | Lean ...

A project constraint is a definite and inflexible limitation or restriction on a project. All constraints are tradeoffs. If you constrain budget, the project may be low quality. If you constrain time, you may face risks if the project is rushed. If you constrain risk, the project may be slow and expensive.
