it's on the N/S/R of the engine below the
compressor..i would suggest you undo
the metal pipe at the common rail and
see what the fuel supply is like ..if no
supply what so ever then if the pipes are
clear ,then the lift pump on the main fuel
pump may have sheared it's drive ..if so
then a complete new pump unit is
required...if you undo the plug and it
starts it will run like a bag of worms with
an red engine warning...unfortunately if
you currently have warnings on the dash
