### Lionel Trainmaster Type Kw Transformer

The Lionel KW is the second most powerful, and second most popular Lionel transformer of the 1950s and 1960s. If the Lionel ZW was Lionel's Cadillac, the KW was Lionel's Buick. It was a 190-watt transformer and Lionel sold it from 1950 to 1965. It replaced Lionel's 150-watt ZW lookalike, the VW.

## Read Online Lionel Trainmaster Type Kw Transformer Manual

The KW is a great transformer, very underrated among collectors and, I think, very underpriced considering its power. There are, though, a few things to be careful of before placing it in service. First, be sure the line cord and circuit breaker are OK. Then check the contact rollers for the two variable voltage taps.

Replacing a Lionel transformer power cord without soldering. If you don't want to solder, pick up one piece of wire from the new cord and its mate from inside the transformer. Twist the two bare copper ends together. Then twist a wire nut clockwise onto the connection. If the nut isn't big enough to cover all of the bare wire, untwist the nut.
