Mercruiser 140 Engine Stalls Under

140 HP 181 cid 3 liter GM Mercruiser built 1985. Runs great at all speeds for one hour then runs rough and stalls. Wait 20 minutes and runs like a charm again for another hour. Spark is good, accelera ... read more

My 1985 Mercruiser 140 I/O stalls out when I slow down ...

However, when I went to bring it up on plane, my port engine would stall at around 2500 rpms... but only under load. I neutral, I can rev the engine for sustained periods without problem and it will return to idle. But in gear... between 2000 and 2500 I see the RPM's start to fluctuate and then it just cuts out.

BoaterEd - Resolved - Engine Stall under load

1987 3.0L OMC Cobra (1998 GM/Mercruiser 3.0LX replacement engine), Rochester 2G 2-bbl. carb., 1987 Bayliner Capri 2152 cuddy. Last year, the boat started to pop and or stumble above 2,600 r.p.m. after 1 mile or so, then more frequently after that. Over the past couple of years, the following have been replaced:-Plugs-Wires-Cap-Rotor-Points ...

BoaterEd - SOLVED!--Backfire/hiccup under load at high r.p.m.

These engines have all kinds of protective devices to prevent you from burning it up or blowing it. Check you temperature, oil pressure, RPM's and water pressure. You should get an alarm prior to any of these problems shutting the engine off. If it is a fuel problem, try hooking up a portable outboard engine fuel tank to the engine and running it.

Why does my 4.3 mercruiser run great for a while, then ...

Starts and runs but when you put her in gear she stalls. - Duration: 2:15. Greg Lasko 17,504 views

Boat Engine dies under load high rpm

140 HP 181 cid 3 liter GM Mercruiser built 1985. Runs great at all speeds for one hour then runs rough and stalls. Wait 20 minutes and runs like a charm again for another hour.

I have a mercruiser 3.0 140 HP 181 engine and I it runs ...

3000 rpm's) the engine bogged and shut off but this time, it restarted. Idled around a bit, reved up again, and at around 3000 rpm's, it shut down. Restarted and idled back into port. Reving the engine out of gear does not cause the problem, only under a load. Even though I had the coil problem, since the last thing I was messing

Mercruiser 5.7L stalls on acceleration - narkive

Mercruiser came up with an ingenious plan to overcome this. They split the gear cable into two separate parts, being the 'shift cable' (from the leg to the engine mounted bracket) and the 'gear cable' (from the control lever to the engine mounted bracket)

Amazon.com: mercruiser 140 parts

1) Engine will quickly turn off and on at idle, at speed, during initial acceleration, and under load at wakeboard speeds (with and without ballast). I haven't seen the problem at wakesurf speeds (9.5-10) with full ballast, but I've probably just been lucky. 2) It doesn't sputter. It doesn't slow down and stall like it's starving for fuel.

Wakeboarder :: SOLVED Cutting Out-07 MerCruiser BLACK ...

3.) choke. bingo, this was my issue. The electric choke was all whaked out of adjustment & sticky. Once I got this dialed in, putting in gear didn't cause a stall. Even though it seemed like I was idling fine and revved fine, it wasn't, and the resistance caused by engaging in gear / tranny / prop caused it to instantly stall.

Starts, idles...stalls when in gear - Maintenance, Tech ...

Hi. I have a 2005 mercruiser 4.3 efi. It cuts out randomly but then either goes to idle or if it stalls, it restarts immediately every time. It can run for days or weeks with no problems but will then do this every few
