Internet History Sourcebooks
The Copernican Revolution was the paradigm shift from the Ptolemaic model of the heavens, which described the cosmos as having Earth stationary at the center of the universe, to the heliocentric model with the Sun at the center of the Solar System. This revolution consisted of two phases; the first being extremely mathematical in nature and the second phase starting in 1610 with the publication ...

Copernican Revolution - Wikipedia
The Scientific Revolution is said to have begun when Nicholas Copernicus released his book, The Revolutions of the Heavenly Bodies, in 1543. He released this book right before he died because he knew that he would be accused of heresy. The church, at this time, believed that the Earth was the center of the universe.
