Amazon.com: The Distracted Mind: Ancient Brains in a High ...

The Distracted Mind by Adam Gazzaley and Larry D. Rosen is a highly engaging read of how we cognitively pursue our goals and how our brains have to frequently overcome internal and external interference, including that from modern technologies, to do this successfully. The book includes excellent, clear examples of what these problems of goal interference are and how they might affect us in our daily lives.

The authors explain that our brains are limited in their ability to pay attention.

The Distracted Mind: Ancient Brains in a High-Tech World ...

Cognitive neuroscientist Adam Gazzaley and psychologist Larry Rosen make a convincing case for what you may have already been thinking: your brain is not well adjusted to our engaging—and distracting—modern world. But in The Distracted Mind: Ancient Brains in a High-Tech World, Gazzaley and Rosen aren't panicking—they're being pragmatic. In part I of their book, they explain how our evolved ability to set high-level goals naturally collides with our ability to control our attention ...

Remedies for the Distracted Mind - Behavioral Scientist

The Distracted Mind: Ancient Brains in a High-Tech World. We are living in extraordinary times. Rapid advances in information technology continuously transform our lives in countless ways. But we are now aware that our increasingly information-saturated world, coupled with growing expectations of constant availability and immediate responsiveness, can place excessive demands on our brains.

The Distracted Mind: Ancient Brains in a High-Tech World

Emotional regulation is central to another of tech's disruptive effects on our ancient brains: exacerbation of tribal tendencies. Our distant ancestors lived in small nomadic bands, the basic social unit for most of human history.
