Windows API calls were an important part of Visual Basic programming in the past, but are seldom necessary with Visual Basic .NET. Whenever possible, you should use managed code from the .NET Framework to perform tasks, instead of Windows API calls. This walkthrough provides information for those situations in which using Windows APIs is necessary.

**Walkthrough: Calling Windows APIs - Visual Basic ...**  
During the heyday of Visual Basic 6, I wrote a complex commercial application and wanted to minimize support costs that arise from a rather finicky Visual Basic 6 runtime. The solution? Write custom methods with calls to the Win32 API for any functions normally provided by the VB6 runtime and eliminate it entirely from the application.
