2020-11-04T14:48:29+01:00. In an appeal to the European Union, more than 180 scientists and doctors from 36 countries warn about the danger of 5G, which will lead to a massive increase in involuntary exposure to electromagnetic radiation. The scientists urge the EU to follow Resolution 1815 of the Council of Europe, asking for an independent task force to reassess the health effects.

EU 5G Appeal - Scientists warn of potential serious health ...

In telecommunications, 5G is the fifth generation technology standard for broadband cellular networks, which cellular phone companies began deploying worldwide in 2019, and is the planned successor to the 4G networks which provide connectivity to most current cellphones. Like its predecessors, 5G networks are cellular networks, in which the service area is divided into small geographical areas ...

5G - Wikipedia

When fully implemented, 5G is set to offer download speeds many times faster than today's 4G LTE networks. A major hurdle for 5G deployment in Europe, however, is market fragmentation and relatively low 4G network penetration, making some operators hesitant to invest heavily in next-generation technology. Author.
